

# TRACK MAINTENANCE AND CONSTRUCTION CANADA

Holland has been a leader in progressive and comprehensive solutions spanning the rail industry for nearly 85 years. We're known across North America as the premier provider of flash-butt welding services and lead the way in track geometry measurement and track maintenance and construction. Our full portfolio of innovative Maintenance of Way services keeps Class 1, Short Line and Transit rail systems running safely and efficiently by giving them the ability to move beyond find and fix to plan for maximum uptime.
