

THE COMPLETE SYSTEM TO ELIMINATE DOOR DAMAGE

Our new Door Defender[™] Protection System has a rugged outdoor-grade polyethylene construction featuring a patent pending bumper profile that acts as a spring to absorb door impacts.

Door Defender[™] is entirely waterproof and has been impact-tested to 3,000 cycles in conditions as harsh as -40° F and +130° F.

The system includes a “one size fits all” side post guard that stretches to cover nearly all autorack structural elements, as well as Holland’s trusted nylon buttons with triple engaging lips.

- Requires no adhesive
- Easy installation
- Life-cycle tested for 3000 impacts
- Nesting design – compact shipping
- Tear-resistant button slots
- Temperature range -40°F to +130°F
