Cut and Slide

The combination of our Mobile Welding and Track Maintenance and Construction Teams have turned thousands of miles of jointed rail into CWR to help our customers save in maintenance costs.

Repair Welding

Flash-butt welds made by a Holland MobileWelder® at affected locations during defect removal are quick, effective, and frequently eliminate the need for installation of additional rail.

Rail Relay Treatment

Relay bolted rail not converted to CWR in place by a Cut and Slide process can easily and efficiently be converted to weld-ready sticks of rail with bolt-hole and battered joint areas removed with Holland rail treatment.

Sparkless Carbide Saw

Increase your efficiency safely with the ability to destress rail while cutting spark free.

Surfacing

The flexibility of Holland's personnel and equipment will meet your requirements large or small on a timely basis.

Roller Line

The flexibility of setup and the portability of our equipment make roller line welding a first option for rail fabrication on many projects.

Tie Renewal

We tailor our tie renewal resources to meet your specific needs – spot renewal, out of face renewal, work in a concentrated area or spread over a greater distance – to ensure the most effective use of your tie replacement dollars.

Track Construction

Whether new track, turnout, diamond or siding construction we provide what you need to get the job done safely and efficiently.

Scrap Pick Up

Our soup to nuts handling of steel scrap will relieve you of the drain on human resources and time.

Crossing Installation

Holland has the experienced personnel and equipment needed to install a quality, long lasting crossing that will require minimal future maintenance.

Turnout Welding

Our Extended Reach MobileWelder® has the capability of welding from a right of way road onto the track, or from one track to an adjacent track, depending on the distance between track centers.

Track Construction Equipment

Grapple Trucks
Excavators
Pettibone Speed Swing
Geismar Rail Threader MPR
Nordco CX Spiker
Teleweld Heater Cars

Rotary Dump
6700 Harsco Tamper
925 Knox Kershaw Regulator
940 Knox Hershaw
Mark Tamper IV – Canada
Snow Fighter – Canada

Joint Elimination and CWR Installation Equipment

Geismar Bolt Machine
Nordco SP2R Spike Puller
Pettibone Speed Swing
Scrap Reclaimer
Nordco CX Spiker
Kribber Adzer
Nordco Anchor Applicator
Model F

Tie Equipment

Grapple truck
SP2R Spike Puller
Tie Crane
Nordco Tripp Tie Inserter
Rail Lifter
Nordco CX Spiker
925 Regulator
6700 Harsco Tamper

Miscellaneous Equipment

Holland Welder w/160 Ton Puller
Bear Saws
Geismar Profile Grinders
Web Polishers
Boom Truck
Crew Trucks/Power Packs
Hi-Rail Backhoe JCB 4CX
Teleweld Heater Car Series 2
6700 Harsco Tamper
925 Kershaw Regulator

Holland[®]

Founded in 1935, Holland has been a leader in progressive and comprehensive solutions spanning the rail industry for nearly 85 years. We're known across North America as the premier provider of flash-butt welding services and lead the way in track geometry measurement and track maintenance and construction. Our full portfolio of innovative Maintenance of Way services keeps Class 1, Short Line and Transit rail systems running safely and efficiently by giving them the ability to move beyond find and fix to plan for maximum uptime.
