

**NEWS RELEASE  
FOR IMMEDIATE RELEASE**

**Holland Enhances Safety Program with Innovative Safety Tools**

**CRETE, IL – May 15, 2017** - Holland LP is excited to introduce the new Safety Database Project which includes: the iAuditor Mobile App, the Industry Safe Dashboard, and the Safety Reporting Form.

The Safety Reporting Form is available to all Holland employees via our Intranet System. It is the primary way to report all Stop the Line occurrences, incidents, collisions and near misses/lesson learned events. The form is easy to fill out and allows for the uploading of photos and other supporting documents. This use of this form standardizes reporting and proactively communicates safety trends.

The iAuditor Mobile App and Industry Safe Dashboard are available to assigned departments or positions. The iAuditor Mobile App houses forms for all safety audits for use by managers and supervisors that preform these audits. The Industry Safe Dashboard is the “one-stop-shop” for all safety reporting data that will allow us to track and trend data. This analysis will help to identify and eliminate safety concerns/issues.

At Holland, while providing outstanding solutions to our customers is a focus, nothing is higher than our commitment to safety. This new Safety Database Project further enhances Holland’s safety programs and reinforces our commitment to safety.

###
